The application for the permit must be made to the Village President or his/her designee, legally describing the property to be used and the purpose of such use. - (b) **Regulations.** Any wireless and utility equipment regulations and decisions on permits shall, at a minimum, ensure that the requirements of this Section are satisfied, unless it is determined that the applicant has established that denial of an application would, within the meaning of federal law, prohibit or effectively prohibit the provision of a telecommunications or personal wireless services, or otherwise violate applicable laws or regulations. If that

determination is made, the requirements of this Section and the wireless and utility equipment regulations may be waived, but only to the extent required to avoid the prohibition.

(c) Standards.

1. Public utility equipment and wireless telecommunications facilities shall be installed and modified in a manner to:
  - a. Minimize risks to public safety. Facilities shall be located at least 5 feet from the nearest edge of the road or at the outer limit of the right-of-way, if less than 5 feet;
  - b. Ensure that placement of facilities on existing towers or utility poles is within the tolerance of those structures. New towers or utility poles may not exceed the greater of 40 feet above grade, or the maximum height of the tallest structure then existing in the Village, and any protrusion therefrom shall be a minimum of 10 feet above grade or such greater height as is necessary to render safe nearby vehicle, bicycle or pedestrian traffic;
  - c. To the maximum extent consistent with the proper operation of the proposed public utility equipment or wireless communications facilities, new facilities, or at a minimum the ground-mounted/equipment cabinet portions thereof, shall be located underground. Those portions of equipment or facilities that cannot be located underground and still function for the intended purpose shall be placed in self-contained and weather-resistant enclosures, shall be colored or powder-coated in muted Earth tones and/or consistent with nearby coloring, and may, at the reasonable discretion of the Village Board, be required to be screened by appropriate landscaping, which shall be maintained by the applicant;
  - d. To the maximum extent practicable, new public utility equipment and/or wireless communications facilities shall be located on existing towers or utility poles, unless the Village Board determines in advance, and for specific reasons stated, that the installation of new towers or utility poles would be preferable to the addition of such facilities to existing structures. All new towers and utility poles shall be the same height as, and shall be aligned with, existing structures along the same right-of-way, and may be located no closer than 125 feet from the nearest facility;
  - e. Maintain, to the maximum extent possible, the integrity and character of the neighborhoods and corridors in which the facilities are located, and shall minimize visual impact. New public utility equipment or wireless communication facilities may not be placed in any location that would interrupt the public vista of Lake Michigan;

- f. Ensure that installations are subject to periodic review to minimize the intrusion on the right-of-way;
  - g. Ensure that the Village bears no risk or liability as a result of the installations; and
  - h. Ensure that applicant's use does not inconvenience the public, interfere with the primary uses of the right-of-way, or hinder the ability of the Village or other government entities to improve, modify, relocate, abandon, or vacate the right-of-way or any portion thereof, or to cause the improvement, modification, relocation, vacation, or abandonment of facilities in the right-of-way.
    - 1. No permit shall be issued unless (i) the public utility operator or wireless service provider applicant has immediate plans to use the proposed facility or (ii) the applicant has a contract with a public utility or wireless service provider that has immediate plans to use the proposed facility.
    - 2. In no event may ground-mounted equipment interfere with pedestrian or vehicular traffic and at all times must comply with the requirements of the Americans with Disabilities Act of 1990.
- (d) Standard Permit Conditions. All permits under this Section are issued subject to the following minimum conditions:
- 1. Compliance. The permit holder shall at all times maintain compliance with all applicable Federal, State, and local laws, regulations, and other rules.
  - 2. Term. A wireless permit issued pursuant to an eligible facilities request shall expire at the same time the permit for the underlying existing wireless telecommunications facility expires. All other permits shall be valid for a period of five years from the date of issuance unless revoked pursuant to subsection (9)(b) of this Section.
  - 3. Contact Information. The permit holder shall at all times maintain with the Village accurate contact information for the permit holder and all public utility or wireless service providers making use of the facility, which shall include a phone number, mailing address, and email address for at least one natural person.
  - 4. Emergencies. The Village shall have the right to support, repair, disable, or remove any elements of the facilities in emergencies or when the facility threatens imminent harm to persons or property.
  - 5. Indemnities. The permit holder, by accepting a permit under this Section, agrees to indemnify, defend, and hold harmless the Village, its elected and appointed officials, officers, employees, agents, representatives, and volunteers (collectively, the "Indemnified Parties") from and against any and all suits, actions, legal or administrative proceedings, claims, demands, damages, liabilities, interest, attorneys'

fees, costs, and expenses of whatsoever kind or nature in any manner caused in whole or in part, or claimed to be caused in whole or in part, by reason of any act, omission, fault, or negligence, whether active or passive, of the permit holder or anyone acting under its direction or control or on its behalf, even if liability is also sought to be imposed on one or more of the Indemnified Parties. The obligation to indemnify, defend, and hold harmless the Indemnified Parties shall be applicable even if the liability results from an act or failure to act on the part of one or more of the Indemnified Parties. However, the obligation does not apply if the liability results from the willful misconduct of an Indemnified Party.

6. Adverse Impacts on Adjacent Properties. The permit holder shall undertake all reasonable efforts to avoid undue adverse impacts to adjacent properties and/or uses that may arise from the construction, operation, maintenance, modification, or removal of the facility.

12. Record Retention. The permit holder shall retain full and complete copies of all permits and other regulatory approvals issued in connection with the facility, which includes without limitation all conditions of approval, approved plans, resolutions, and other documentation associated with the permit or regulatory approval. In the event the Village cannot locate any such full and complete permits or other regulatory approvals in its official records, and the permit holder fails to retain full and complete records in the permit holder's files, any ambiguities or uncertainties that would be resolved through an examination of the missing documents will be conclusively resolved against the permit holder.
13. Radio Frequency Emissions. Every wireless facility shall at all times comply with applicable FCC regulations governing radio frequency

emissions, and failure to comply with such regulations shall be treated as a material violation of the terms of the permit.

14. Certificate of Insurance. A certificate of insurance, indicating the Village has been named as an additional insured thereto, sufficient to demonstrate to the satisfaction of the Administrator that the applicant has the capability to cover any liability that might arise out of the presence of the facility in the right-of-way.

(8) Application Processing and Appeal.

- (a) Rejection for Incompleteness. Notices of incompleteness shall be provided in conformity with state, local, and federal law, including, with respect to wireless communication facilities, 47 C.F.R. § 1.6003(d), as amended. Unless a shorter response time is required by federal, state, or local law, or as may otherwise be agreed to by the applicant and the village, an application covered by Wis. Stat. § 66.0414 shall be deemed complete unless the Village gives the applicant a notice of incompleteness within 10 days of submittal. (Amended by 2019-3 on 11-25-2019)
- (b) Processing Timeline. Wireless permit applications (including applications for other permits under Section 6(b)(8) necessary to place or modify the facility) and appeals will be processed in conformity with the shot clocks set forth in state, local, and federal law, as amended. All other permit applications shall be processed within a reasonable time or as otherwise required by state or local law. Unless a shorter response time is required by federal, state, or local law, or as may otherwise be agreed to by the applicant and the village, an application covered by Wis. Stat. § 66.0414 for a collocation on an existing utility pole shall be deemed approved unless acted upon by the Village within 60 days of the application being deemed complete, and an application involving the construction of a new or replacement utility pole shall be deemed complete unless acted upon by the Village within 90 days of the application being deemed complete. (Amended by 2019-3 on 11-25-2019)
- (c) Written Decision. In the event that an application is denied (or approved with conditions beyond the standard permit conditions set forth in Section 7(d)), the Administrator shall issue a written decision with the reasons therefor, supported by substantial evidence contained in a written record.
- (d) Appeal to Village Board. Any person adversely affected by the decision of the Administrator may appeal that decision to the Village Board, which may decide the issues *de novo*, and whose written decision will be the final decision of the Village. An appeal by a infrastructure provider applicant must be taken jointly with the public utility or the wireless service provider that intends to use the facility.
- (e) Deadline to Appeal.
  1. Appeals that involve “eligible facilities requests” must be filed within three business days of the written decision of the Administrator.
  2. All other appeals not governed by subsection (8)(e)1, above, must be filed within ten business days of the written decision of the

Administrator, unless the Administrator extends the time therefor. An extension may not be granted where extension would result in approval of the application by operation of law.

- (f) Decision Deadline. All appeals shall be conducted so that a timely written decision may be issued in accordance with the applicable shot clock.

(9) Expiration and Revocation.

- (a) Expiration. A wireless permit issued pursuant to an “eligible facilities request” shall expire at the same time the permit for the underlying existing wireless telecommunications facility expires. All other permits shall be valid for a period of five years from the date of issuance. Upon expiration of the permit, the permit holder must either:

1. Remove the facility; or,
2. Submit an application to renew the permit at least 90 days prior to its expiration. The facility must remain in place until the renewal application is acted on by the Village and any appeals from the Village’s decision are exhausted.

- (b) Revocation for Breach. A permit may be revoked for failure to comply with the conditions of the permit or applicable federal, state, or local laws, rules, or regulations. Upon revocation, the facility must be removed within 30 days of receipt of written notice from the Village. All costs incurred by the Village in connection with the revocation, removal, and right-of-way restoration shall be paid by the permit holder.\

- (c) Failure to Obtain Permit. Unless exempted from permitting by subsection (3)(b) of this Section, a facility installed without a permit must be removed within 30 days of receipt of written notice from the Village. All costs incurred by the Village in connection with the notice, removal, and right-of-way restoration shall be paid by entities who own or control any part of the facility. Notwithstanding the above, if a facility that was installed prior to Village approval is subsequently applied for and approved, such facility shall be subject to double applicable the permit application fee(s).

- (10) Relocation. Except as otherwise prohibited by state or federal law, a permit holder must promptly and at its own expense, with due regard for seasonal working conditions, permanently remove and relocate any of its facilities in the right-of-way whenever the Village requests such removal and relocation. The Village may make such a request to prevent the facility from interfering with: a present or future Village use of the right-of-way; a public improvement undertaken by the Village; an economic development project in which the Village has an interest or investment; when the public health, safety, or welfare require it; or when necessary to prevent interference with the safety and convenience of ordinary travel over the right-of-way. Notwithstanding the foregoing, a permit holder shall not be required to remove or relocate its facilities from any right-of-way that has been vacated in favor of a non-governmental entity unless and until that entity pays the reasonable costs of removal or relocation to the permit holder.

(11) Abandonment.

- (a) Cessation Use. In the event that a permitted facility within the right-of-way is not in use for a continuous period of 60 days or longer, the permit holder must promptly notify the Village and do one of the following:
  - 1. Provide information satisfactory to the Administrator that the permit holder's obligations for its facilities under this Section have been lawfully assumed by another permit holder.
  - 2. Submit to the Administrator a proposal and instruments for dedication of the facilities to the Village. If a permit holder proceeds under this subsection (11)(a)2, the Village may, at its option:
    - a. Accept the dedication for all or a portion of the facilities;
    - b. Require the permit holder, at its own expense, to remove the facilities and perform the required restoration under subsection 12; or
    - c. Require the permit holder to post a bond or provide payment sufficient to reimburse the Village for reasonably anticipated costs to be incurred in removing the facilities and undertaking restoration under 12.
  - 3. Remove its facilities from the right-of-way within one year and perform the required restoration under subsection 12, unless the Administrator waives this requirement or provides a later deadline.
- (b) Abandoned Facilities. Facilities of a permit holder who fails to comply with subsection (11)(a) and which, for one year, remain unused shall be deemed to be abandoned. Abandoned facilities are deemed to be a nuisance. In addition to any remedies or rights it has at law or in equity, the Village may, at its option:
  - 1. abate the nuisance and recover the cost from the permit holder or the permit holder's successor in interest;
  - 2. take possession of the facilities, dispose of them as the Village sees fit, and retain any proceeds from such disposal to defray the Village's costs under this Section; and/or
  - 3. require removal of the facilities by the permit holder or the permit holder's successor in interest.
- (12) Restoration. In the event that a permit holder removes or is required to remove a facility from the right-of-way under this Section (or to relocate it pursuant to subsection (10)), the permit holder must restore the right-of-way to its prior condition in accordance with Village specifications. However, a support structure owned by another entity authorized to maintain that support structure in the right-of-way need not be removed but must instead be restored to its prior condition. If the permit holder fails to make the restorations required by this subsection 12, the Village at its option may do such work. In that event, the permit holder shall pay to the Village, within 30 days of billing therefor, the cost of restoring the right-of-way.
- (13) Placement on Village-Owned or Village-Controlled Structures. The Village may negotiate agreements for placement of public utility equipment or wireless

telecommunications facilities on Village-owned or -controlled structures, including those on public lands or in the public right-of-way. The agreement shall specify the compensation to the Village for use of the structures. The person or entity seeking the agreement shall reimburse the Village for all costs the Village incurs in connection with its review of and action upon the request for an agreement.

- (14) Severability. If any section, subsection, clause, phrase, or portion of this Section is for any reason held to be illegal or otherwise invalid by any court or administrative agency of competent jurisdiction, such illegal or invalid portion shall be severable and shall not affect or impair any remaining portion of this Section, which shall remain in full force and effect.

### **8.01 PURPOSE**

*Repealed and recreated by Ordinance 2022-2 on 5.23.2022*

The purpose of this Ordinance is to promote the public health, safety and general welfare of the community and these regulations are designed to lessen congestion in the streets and highways; to further the orderly layout and use of land; to secure safety from fire, panic and other dangers; to prevent overcrowding of lands; to avoid undue concentration of population; to facilitate adequate provisions for transportation, water, sewerage, schools, parks, playgrounds and other public requirements; to insure proper legal description and proper monumenting of land subdivided. The historic Village of North Bay is an eclectic confluence of architectural styles deployed over several decades. Houses were designed to complement the rolling landscape, lake views, original trees, and existing homes creating the “North Bay aesthetic”. This unique mosaic of contemporary, traditional and revival architecture that characterizes North Bay has attracted home buyers from across the country. It is a source of pride to residents and is a key component of maintaining our unique completely exclusive residential community which is the only complete residential community in Racine County. These regulations are made with reasonable consideration, among other things, of the character of the Village with a view of conserving if not increasing the value of the buildings placed upon land, providing the best possible environment for human habitation and for encouraging the most appropriate use of land throughout the Village.

7. Any change, addition, modification, alteration and/or amendment of any aspect of this conditional use, including but not limited to an addition, modification, alteration, and/or amendment to the use, premises (including but not limited to any change to the boundary limits of the subject property), structures, lands or owners, other than as specifically authorized herein, shall require a new permit and all procedures in place at the time must be followed.

12. Current Address. The Petitioner is obligated to file with the Village Clerk a current mailing address and current phone number at which the Petitioner can be reached, which must be continually updated by

the Petitioner if such contact information should change, for the duration of this conditional use. If the Petitioner fails to maintain such current contact information, the Petitioner thereby automatically waives notice of any proceedings that may be commenced under this conditional approval, including proceedings to terminate this conditional use.

  15. If any aspect of this conditional use permit or any aspect of any plan contemplated and approved under this conditional use is in conflict with any other aspect of the conditional use or any aspect of any plan of the conditional use, the more restrictive provision shall be controlling as determined by the Village Plan Commission.

Village Board Action. Following a public hearing held jointly with the Village Planning Commission, and after careful consideration of the Village Planning Commission's recommendation, the Village Board may grant the Conditional Use Permit as applied for, grant the Conditional Use Permit with conditions deemed appropriate by the Board, or deny the permit, based upon whether the standards of the ordinance have been met as demonstrated by substantial evidence at the hearing. The requirements of Section 62.23(7)(de) Wisconsin Statutes shall apply. The provisions of any Conditional Use Permit granted by the Village Board shall comply with all of the provisions of this Chapter and the Village of North Bay Code of Ordinances.

(9) As-Built Survey Required. The holder of a Conditional Use Permit for any conditional use involving soil disruption shall submit to the Building

Inspector/Zoning Administrator an as-built survey of the affected property or site upon completion of construction. The Building Inspector/Zoning Administrator may waive the requirement of an as-built survey if satisfied that all terms of the Conditional Use Permit and requirements of this Ordinance have been met.

### **8.11 VARIANCES**

- (1) Purpose. The Board of Appeals, after a public hearing, may vary the regulations of this Chapter in harmony with their general purpose and intent, only in the specific instances set forth in this Subsection 8.11, where such Board makes findings of fact in accordance with the standards prescribed in this Subsection 8.11, and further, finds that there are practical difficulties or particular hardships in the way of carrying out the strict letter of this regulations of the Chapter and/or other applicable provisions of the Village of North Bay Code of Ordinances.
- (2) Application; notice of hearing. Application for a variance shall be filed with the Village Zoning Administrator. The application shall contain such information as is required by the Board of Appeals. Notices shall also be mailed to owners of all property within 200 feet of the subject site. The board shall reach its decision within 45 days of the date of hearing. (Code 1972, & 16.03.080(b)) (Amended by Ord. 2016-01 on 07-11-2016).
- (3) Standards for variances
  - (a) The Board of Appeals shall not vary the regulations of this chapter unless it shall make finding based upon the evidence presented to it in each specific case that:
    - (i) Because of the particular physical surroundings, shape, or topographical conditions of the specific property involved, a particular hardship to the owner would result, as distinguished from a mere inconvenience, if the strict letter of the regulations were to be carried out;
    - (ii) The conditions upon which an application for a variance is based are unique to the property for which the variance is sought, and are not applicable, generally, to other property within the same zoning classification;
    - (iii) The purpose of the variance is not based exclusively upon a desire to increase financial gain;
    - (iv) The alleged difficulty or hardship is caused by the provisions of this Chapter and has not been created by any person(s) presently having an interest in the property;
    - (v) The granting of the variance will not be detrimental to the public welfare or injurious to other property or improvements in the neighborhood in which the property is located; and
    - (vi) The proposed variance will not impair an adequate supply of light and air to adjacent property, or substantially increase the congestion of the public streets, or increase the danger of fire, or impair natural drainage or create drainage problems on adjacent properties, or endanger the public safety, or diminish or impair property values within the neighborhood.

- (b) The Board of Appeals may impose such conditions and restrictions upon the premises benefited by a variance as may be necessary to comply with the standards established in this section and the objectives of this chapter.
- (4) Revocation. Where a variance has been granted pursuant to the provisions of this chapter, such approval shall become null and void unless work thereon is substantially under way within 12 months of the date of issuance, unless extended by the Board of Appeals.
- (5) Reserved

The Zoning Administrator shall transmit to the Board of Appeals all the papers constituting a record upon which the action appealed from was taken.
- (7) Findings on appeals. An appeal shall stay all enforcement proceedings of the Village in furtherance of the action appealed from unless the Zoning Administrator certifies to the Board of Appeals, after the notice of the appeal has been filed with him, that by reason of facts stated in the certificate a stay would, in his opinion, cause imminent peril to life and/or property, in which case the said enforcement proceedings shall not be stayed unless otherwise directed by a court having jurisdiction in the matter.
- (8) Notice of hearing. A notice of hearing shall be published once in a newspaper of general circulation in the Village, not more than Fifteen (15) days nor less than Seven (7) days before the date of hearing. Notices shall also be mailed to owners of all property within 200 feet of the subject site. The Board of Appeals shall reach its decision within Forty-five (45) days of the date of hearing.
- (9) Disposition of appeals. The Board of Appeals may affirm or may reverse, wholly or in part, or modify, the order, requirement, decision or determination of the Zoning Administrator and, to that end, shall have all the powers of the officer from whom the appeal is taken. The Zoning Administrator shall maintain records of all actions of the board relative to the appeals.

#### **8.14 FENCES**

- (1) Declaration of Policy.
  - (a) The intent of this ordinance is to establish standards for the location and design characteristics of and permits for fences within the Village of North Bay.
  - (b) The intent of this ordinance is also to provide a policy as to fences currently located within public drainage, sanitary sewer or water easements or public rights-of-way within the Village of North Bay.
- (2) Definitions.
  - (a) Fence. A fence is an artificial structure of posts and boards, wire, pickets, panels, rails or similar materials that is used as an enclosure of land. For purposes of this chapter, a fence shall not include vegetation, nor shall it include a retaining wall that retains or supports earth. Additionally, a fence shall not include a temporary snow fence that is installed and removed within the months of November through April, nor shall it include any temporary fence required by law, nor shall it include any “invisible fence” which is comprised entirely of buried wiring and which is designed to contain pets.
  - (b) Primary frontage. The primary frontage is a boundary of a lot bordering a public right-of-way. If a lot borders more than one public right-of-way, the primary frontage is the boundary of a lot bordering a public road right-of-way geographically situated in relation to and most convenient to the main entrance of the building.
  - (c) Front yard. The front yard of a residential property is the portion of a lot between the front of the residence and public road right-of-way bordering the primary frontage located between the side-yard property lines.
  - (d) Front of the residence. The front of the residence is any portion of the residence, including attached garages but not including architectural appurtenances, facing the primary frontage.
  - (e) Good side. The good side of the fence is the side of the fence that by virtue of design and appearance would generally be considered as the most aesthetically pleasing side of the fence.
  - (f) District. Any sanitary district or utility district operating in the Village of North Bay.
- (3) Design
  - (a) Height.
    - (i) No fence shall exceed eight (8) feet in height above ground level, as installed.

- (ii) A supporting fence post that is set into the ground may not exceed 8 feet, 6 inches (8'6") in height above ground level, as installed.
    - (iii) In no event shall any provision of this chapter be construed to permit a spite fence in violation of Section 844.10, Wisconsin Statutes.
  - (b) Prohibited Materials. No person shall construct or cause to be constructed, in whole or in part, a fence with barbed wire, razor wire, electrified wire, or any wire fabric within the Village.
  - (c) Maintenance. A fence shall be maintained by the property owner in a structurally adequate condition. Posts, supports, rails, boards, panels, etc. shall be repaired or replaced as reasonably required toward that purpose.
  - (d) Aesthetics.
    - (i) The good side of a fence shall face toward the adjoining property and toward the public road right-of-way if any portion of a fence extending along the public road is within fifty (50) feet of the public road right-of-way.
    - (ii) The Building Inspector shall determine which side of a fence is the good side and shall provide property owners with his determination upon request. The Building Inspector may require the property owner to provide sufficient evidence to make said determination. The determination of the Building Inspector may be appealed to the Village Board, whose determination shall be final.
- (4) Location
  - (a) A fence may be located within street, side, rear, and shore yard setbacks as permitted by applicable zoning ordinances, unless otherwise prohibited or restricted herein or unless prohibited, restricted or allowed by a Conditional Use Permit/Site Plan Review or variance.
  - (b) A fence may not be located within a public drainage, sanitary sewer, electrical, cable television or water easement or within a public right-of-way unless authorized elsewhere in this chapter. Any fence located in an easement area that must be removed so as to facilitate utility access or repair shall be removed at the fence owner's expense, without recourse to the Village or utility.
- (5) Permits
  - (a) No person shall install or construct or cause to be installed or constructed a fence within the Village of North Bay without first obtaining a permit therefor from the Building Inspector as herein provided.
  - (b) Any person desiring a permit for the installation or construction of a fence within the Village of North Bay shall file a written application form provided by the Village with the Building Inspector.
  - (c) A permit fee in an amount as established by and as may be modified from time to time by resolution of the Village Board of the Village of North Bay shall be paid at the time of the filing of the application for a permit hereunder.
  - (d) A permit issued pursuant to this chapter shall be valid and permit construction of the fence for a period of one (1) year from date of issuance. If the fence is not completed within such period, a new permit shall be required.

- (e) The Building Inspector or his representative shall have a right to enter upon the premises to inspect the fence and its construction to insure compliance with the permit and the provisions of this chapter.
  - (f) As a condition of receiving a permit under this section, the owner agrees to defend, indemnify and hold the Village of North Bay harmless from and against all claims, including boundary disputes, for injury or damage received or sustained by any person or entity in connection with the installation or construction of a permitted fence.
6. Prohibited Locations.
- (a) No fence may be located within a front yard.
  - (b) Fences located within a public right-of-way shall not be permitted and shall be removed.
  - (c) A fence currently located within a public drainage, sanitary sewer, electrical, cable television or water easement in the Village of North Bay shall be permitted to remain unless in the opinion of the Building Inspector the fence is determined to obstruct the purpose for which the easement was obtained or the maintenance of the easement, including underground lines. If the easement is under the jurisdiction of a District, the Building Inspector shall consult with such District in rendering an opinion under this subsection. The determination of the Building Inspector as to the existence of an obstruction may be appealed as set forth below.
  - (d) Any fence that is required to be removed and is removed, either by the owner or the Village, because of a violation of this Chapter, may be replaced at the cost of the owner if in the opinion of the Building Inspector the fence could not obstruct the purpose for which the public drainage, sanitary sewer, electrical, cable television or water easement was obtained or the maintenance related to such easement; provided that the owner shall agree to be responsible for the removal of the fence in the event of future interference with the purpose for which the easement was obtained or the operation or maintenance of the easement including underground lines; and provided that a permit is applied for and issued as provided in this chapter.
  - (e) The Building Inspector may order any fence located within the Village of North Bay contrary to the provisions of this chapter to be removed, repaired or otherwise corrected, as the case may be. Such notice shall be in writing and delivered to the last known owner of the property where the fence is located, either delivered in person or by first-class mail addressed to the last known address of the owner, directing the work or action which is required to be taken. The work or action shall be completed within thirty (30) days after receipt of the notice in the case of personal delivery or after the mailing of the notice in the case of mailing. Upon written request of the Owner, and for good cause shown, the Village Board may extend the time for compliance with the order provided the property owner waives any appeal rights set forth below.
  - (f) Any person shall have a right to request a review of the determination of the Building Inspector under this chapter or an order issued hereunder by filing a request for review with the Village Board. Failure to comply with the notice of required action shall permit the Village of North Bay to enter upon the premises and complete such action, and any cost to the Village

of North Bay shall be charged as a special charge against the property as provided in Section 66.0627, Wisconsin Statutes.

- (g) Fences existing in any residential district prior to the effective date of this chapter which do not meet the regulations of this chapter are permitted to be:
  - (i) Repaired for ordinary maintenance, including painting, staining, and cleaning. No permit shall be required for such work.
  - (ii) Replaced; provided, however, that a permit is obtained for the construction of the replacement fence. No permit fee shall be required for a permit for a replacement fence.
- (h) As an exception to any notice requirements set forth above, the Village President may order the emergency removal of a fence, or a portion thereof, where there is an immediate danger to persons or property, or a significant maintenance concern. This determination shall be made by the Village President, upon the recommendation of the Building Inspector.

### **8.15 AMENDMENTS**

The provisions of this Chapter may only be changed following a public hearing, preceded by a Class 2 notice, after a recommendation of the Planning Commission, and after notification to neighboring municipalities, as necessary, pursuant to the procedure, and subject to the protest provisions, set forth in WI Stats. 62.23(7)(d).

### **CONTINUATION OF EXISTING PROVISIONS**

The provisions of this ordinance, to the extent that they are substantively the same as those of the ordinances in force immediately prior to the enactment of this ordinance, are intended as a continuation of such ordinances and not as new enactments, and the effectiveness of such provisions shall date from the date of adoption of the prior ordinances. In addition, the adoption of this ordinance shall not affect any action, prosecution or proceeding brought for the enforcement of any right or liability established, accrued or incurred under any legislative provision prior to the effective date of this ordinance for the time that such provision was in effect, and the repeal of any such provisions is stayed pending the final resolution of such actions, including appeals.

### **SEVERABILITY**

The several sections of this Ordinance are declared to be severable. If any section or provision thereof shall be declared by a court of competent jurisdiction to be invalid, unlawful, or unenforceable, such declaration shall apply only to the specific section(s) or portion(s) thereof directly specified in said declaration, and shall not affect the validity of any other provisions, sections, or portions of the Ordinance, which shall remain in full force and effect. Any other Ordinances whose terms are in conflict with the provisions of this Ordinance are hereby repealed as to those terms that conflict.

The term "single-family dwelling" and/or "one-family dwelling", however, shall include a community-based residential facility to the extent that it is necessary to do so in accordance with the applicable laws of the State of Wisconsin and/or the United States of America. An owner of

contiguous lots, or portions thereof, within the Village limits, may build closer to or on the dividing line between the lots or portions thereof, but thereafter such contiguous lots, or portions thereof, shall be treated as one lot for the occupancy of one dwelling and the front, side and rear lot lines shall thereafter be the same as if the entire parcel was initially one lot.

- (b) **Size of Dwellings.** One floor residences erected in the Village shall have minimum living space area of 1,700 square feet. Two floor residences shall have minimum living space area of 2,000 square feet with not less than 1,400 square feet on the ground floor, except that in the erection of two floor residences, the minimum requirement of living space may vary or change by adding to the second floor two and one-half square feet for each square foot reduction on the ground floor. Notwithstanding the foregoing roof height restrictions, if a lot within the Village limits is already improved with a residence at the time of the adoption of this ordinance, and in the further event that such presently-existing residence has a roof that exceeds the height restrictions stated above, then when and if such residence (the "Lawful Nonconforming Residence") is in the future razed or demolished (in whole or in part, and whether intentionally or unintentionally), the replacement residence constructed on the lot may have a roof height, as determined above, that is less than or equal to the original roof height of the razed/demolished Lawful Nonconforming Residence. (See Ordinance 2007-01, adopted 6-11-07.)

- (4) **Unsafe Buildings.** Whenever the Building Inspector finds any building or part thereof within the Village to be, in his judgment, so old, dilapidated or so out of repair as to be dangerous, unsafe, unsanitary or otherwise unfit for human habitation, occupancy or use and so that it would be unreasonable to repair the same, he shall order the owner to raze and remove such building or part thereof, or if it can be made safe by repairs, to repair and make safe and sanitary or raze and remove at the owner's option. Such order and proceedings shall be as provided in Section 66.0413 of the Wisconsin Statutes.

#### **10.08 PORTABLE TOILETS AND DUMPSTERS.**

This Section requires the location of portable toilets and dumpsters at the site of any new construction within the Village, regardless of the zoning of such site. For purposes of this Section only, “new construction,” means the construction of any new building that will be the primary structure on the property, and not the construction of structures accessory thereto; “adjacent properties,” means those properties sharing a common property line, and not those physically separated by any road, stream or other public right-of-way.

- (1) Portable Toilets.
- (a) Intent. The intent of this Section is to ensure that individuals have access to hygienic lavatory facilities at the sites of new construction within the Village.
  - (b) Duration. Portable toilets must be delivered to the new construction site after any footings or foundation is poured and back-filling is completed, and prior to any further work taking place at the site. The portable toilet must remain at the site until an occupancy permit therefor is issued. At the time of application for the first permit for any new construction, the applicant must produce evidence that a portable toilet has been rented for the subject property.
  - (c) Location. Portable toilets must be located outside of any road right-of-way. A portable toilet must also be located where it can be easily accessed and serviced and, unless circumstances otherwise dictate and the Building

Inspector approves in advance, at least 15 feet from the nearest property line of any adjacent property.

(d) Number And Servicing Frequency.

- (i) Each new construction site shall be served by at least one portable toilet. A single portable toilet shall be sufficient to serve approximately ten people who are regularly at the site over the course of a forty-hour week. Portable toilets must be serviced, i.e. cleaned, restocked of paper products, and emptied of waste, at least once per week. A record of the portable toilet's servicing dates must be kept and must be made available for review in a timely manner upon request.
- (ii) If more than ten people are, or are regularly expected to be, at the new construction site, or if ten or fewer people are, or are regularly expected to be, at the site for more than forty hours per week, the number of portable toilets required or the servicing frequency thereof must be increased proportionately.
- (iii) If a single property owner or contractor is undertaking new construction at two adjacent properties, a single portable toilet, subject to the above man-hour guidelines set forth in subparagraph (a), may serve the two adjacent properties, provided that when an occupancy permit is issued for one of the adjacent properties, the portable toilet must be moved to the other property, if construction is continuing thereat, and located as set forth in Subparagraph (c) above.

(2) Dumpsters.

- (a) Intent. The intent of this subsection is that all construction debris at new construction sites shall be stored in a suitable location so as to prevent any such debris from entering the surrounding environment.
- (b) Size and construction. Dumpsters shall be constructed of metal, plywood, plastic or other material sufficiently sturdy to withstand the construction process and exposure to the elements without allowing any construction debris to enter the surrounding environment. Metal dumpsters shall have a volume of at least 10 cubic yards and dumpsters made of plywood, plastic or other material shall have a minimum volume of 9.4 cubic yards.
- (c) Duration. Construction debris receptacles must be located at the new construction site before any exterior framing work begins. Following the installation of an operational garage door, construction-related debris shall be stored in such enclosed, interior space if all dumpsters have been removed from the site. Whenever the site is unoccupied, the garage or other door must remain closed so as to prevent any construction debris stored therein from entering the surrounding environment.
- (d) Location. Dumpsters must be located outside of any road right-of-way. Dumpsters must also be located where they can be easily accessed and serviced, i.e. emptied and/or removed/replaced. Additionally, unless circumstances otherwise dictate and the Building Inspector approves in advance, dumpsters must be located at least 15 feet from the nearest property line of any adjacent property.

- (e) Number, Size, and Servicing Frequency. Every new construction site shall have at least one dumpster conforming to the specifications and limitations contained in this Section, or two dumpsters that, taken together, contain the minimum volume of a single dumpster as set forth above. Dumpsters shall be adequately sized and serviced frequently enough so as to completely contain the construction debris therein and prevent any such construction debris from entering the surrounding environment due to rain, wind, etc.
- (3) Violations. If the Building Inspector finds a new construction site to be in violation of any provision of this Section, he or she may issue an immediate stop-work order, may refuse to perform or to return to the site for any additional inspections, or, in his or her discretion, may allow the builder and/or property owner such time as is reasonable under the circumstances to remedy the violation. In lieu of, or in addition to, the issuance of a stop-work order under the subsection, the Building Inspector may also cause the property owner or contractor to be issued one or more citations under Section 10.09. Each separate violation of any provision of this Section, and each day a violation continues, shall constitute a separate offense.

#### **10.09 PENALTIES.**

In addition to the revocation provisions herein, the penalty for violating any provision of this Chapter shall be as provided in Section 19.04 of this Code. A separate offense shall be deemed committed on each day on which a violation of any provision of this Chapter occurs or continues.
